

Baby Wearing

Sounds great, doesn't it? If you carry your baby with you, they're content and enjoy the view, and you can get on with two hands free!

We're not suggesting you do any housework when you have a baby, that's just not right, but, some days you just have to do something, and the baby just doesn't want to be put down!

They enjoy travelling this way, and of course it makes for a much easier journey without a buggy.

Conker member Soulamber gives us a visual demonstration here of three different types of carrying.

Back carry

Hip carry
